VEHICLE FEATURES

The GR Cup Series introduces the GR86 Cup Car, a race-ready version of the streetcar. Designed strictly for competition, the GR86 Cup Car utilizes a production-based 2.4L DOHC horizontally opposed four-cylinder engine paired with a custom high-flow Borla exhaust. Engine management is controlled by a Bosch Motorsport ECU and power is delivered through a SADEV race-spec 6-speed sequential transmission.

Additional vehicle features include: FIA certified roll cage, Alcon 4 piston front and 2 piston rear brakes, TGRNA designed MacPherson struts, JRi dual-adjustable shocks, TGRNA designed front splitter, APR carbon fiber rear wing, ATL 22 gallon fuel cell, OMP safety equipment, and various Stratasys 3D printed components.
