

Colocation

More scalable, more reliable, more secure.

Connectivity without compromise. Scalability and security without sacrifice.

Why Segra Data Colocation

There's no shortage of data and no limits to the amount of new information generated every day. As the volume has increased, so have the challenges and costs involved with storage and processing.

Segra Colocation provides a secure and private way to run mission-critical systems from beyond the walls of a self-hosted server room. Fully dedicated for peace of mind and fully accessible — take control of your IT infrastructure and elevate your application performance without sacrificing security.

Features and Benefits

- **Monitored and managed** by Segra's Network Operations Center 24/7/365.
- **Direct connection to Segra fiber-based footprint** ensures a smooth and secure flow of traffic.
- **Robust on-site security systems** ensure only the people you authorize can access your systems.
- **Multiple redundancies and diverse power** — including UPS, generator backup and dual-powered A&B supplies — keep critical systems running without interruption.
- **Caged, uncaged and private cabinet configurations** offer superior security and control for core business operations.

Specifications

-  Tier 3 and Tier 4 data centers
-  99.99% availability
-  Caged and uncaged options available
-  SSAE 16, HIPAA and PCI DSS compliant
-  SOC 1 and SOC 2 certified
-  Multiple layers of network diversity and redundancy
-  Direct and resilient access to the full Segra fiber footprint
-  24/7/365 Support
