

Disaster Recovery as a **Service**

Bounce back without losing a beat.

When disaster strikes, few things matter more than a plan that makes it easy to pick up where you left off.

Disruptions are Inevitable. Losing Time and Money Shouldn't Be.

Hurricanes. Cyberattacks. Power outages. Routine maintenance and upgrades gone wrong. Disruptions happen. When they do, nothing is more important than getting back up and running as quickly as possible.

Time is money — network downtime can cost as much as \$5,600 per minute according to Gartner. Segra Disaster Recovery as a Service (DRaaS) replicates critical information and applications in real time, making it possible to get back to work without missing a beat.

Features and Benefits

- **24/7/365 support** from local experts delivers added peace of mind.
- **Roll back and recover files**, apps and VMS quickly with 30-day journaling.
- **Lightning-fast recovery** with RPO times of seconds and RTO of minutes.
- **Easily recover apps or entire VMs** from a second location with live state storage.
- **Storage-agnostic** supports mixed hypervisors, and public/private/hybrid cloud environments.
