

Infrastructure as a **Service**

On-demand cloud infrastructure for
an on-the-go workplace

Business happens “wherever, whenever.” You can’t afford to rely on infrastructure that’s stuck in “one place, one time.”

Speed and Power. Reliability and Affordability. Anywhere and Any Time.

Whether you’re making your applications more accessible, hosting a secure website or creating a data lake for analytics, building a competitive edge in a digital-first world starts by looking beyond the server room.

High-performance cloud-powered storage and compute resources remove the heavy lifting involved with on-prem infrastructure so you can spend more time strategizing instead of stressing.

Features and Benefits

- **On-the-go access to applications and data** allows for business wherever, whenever.
- **High-availability infrastructure** delivers greater control and performance.
- **On-demand infrastructure scaling** equals adjusting capacity and bandwidth as needed.
- **Pay-as-you-go plans** ensures paying only for the resources you need.
- **Always-on-and-ready virtualization, hardware, storage and networking** means more work, less worry.

Specifications

24/7/365 support

Real-time OS monitoring
and patching

On-demand scaling

SSAE SOC-1 and
SOC-2 certified

HIPAA and PCI
DSS compliant

Available throughout
Segra’s fiber-based
private footprint
