

Hosted Voice with Webex

Next-level communications and collaboration for workplaces without walls

Connecting with colleagues and clients looks different than it did just a few years ago, and so do the systems that make it possible to stay in touch. Your ability to do business as usual requires more than what siloed collaboration and communication platforms can deliver.

Why Segra Hosted Voice with Webex

Sending the right message shouldn't be a struggle. Business demands have changed, and standalone systems struggle to keep up.

Segra Hosted Voice with Webex unites calling and collaboration technology into a single, streamlined platform for real-time communication from anywhere, anytime with advanced meeting and messaging capabilities. Because performance and privacy matter, the solution relies on our private, high-speed fiber network and features end-to-end encryption to protect your meetings, files, shared information and more. **This is what effectively connected communication and collaboration look like.**

Features and Benefits

- **Integrations with popular apps** such as Slack, Zendesk, Microsoft, Google, and more, support seamless productivity and collaboration.
- Geography is not a limit, thanks to **location-agnostic design** that works no matter where you are — in-office, at home or on the go.
- **Choose the level of service** you need from four available bundles — Standard, Professional, Professional + and Premium.

Hosted Voice with Webex Packages

Standard

Ideal for in-office staff with minimal calling or collaboration duties

- Voicemail to email
- Softphone with single number reach for mobile and desktop calling
