

IP Fax

The power of fiber for better faxing

Digital is everywhere, but legacy systems still have their place. Even fax machines. It's time to give this workplace staple new life with high-speed fiber.

Why Segra IP Fax

Typewriters and carbon paper are out, but fax machines are still relevant in modern business. Sure, they've been around for a while — that's no reason to keep them dependent on a sluggish analog line.

Segra IP Fax replaces outdated legacy equipment and connections with high-speed, reliable fiber. Phone lines, fax board hardware or dedicated fax servers aren't required to send paper-based and workstation-generated documents. The only equipment needed to add new power to your office workhorse is an Analog Telephone Adapter (ATA), which is included with the service.

More reliable, more efficient, more affordable. **That's the power of Segra IP Fax.**

Features and Benefits

- **GHIPAA-, SOX- and FBI Criminal Justice Information System (CJIS)-compliance** maintains the privacy and security you need.
- **Cut out operational complexity.** Fax, voice and data traffic are all sent over a single line.
- **Fax over IP** uses the IP network you already have and eliminates the need for standalone legacy equipment.

Specifications

-  Monitored and managed 24/7
-  Integrates with Segra Voice Service
-  Local support from Segra Customer Solution Center
-  Same low cost as Segra Hosted Voice
