

Dedicated Internet Access (DIA)

Fast, never shared access that moves at the speed of business

All business internet connections are not created equal. Every minute spent struggling with a slow, unreliable connection is time you could be working strategically to help your business lead and succeed.

Why Segra DIA

The right internet connection can be a make-or-break factor in today's highly online world. When it comes to moving at the speed of work, business-grade access is a must.

Fiber-based DIA from Segra delivers private, high-performance internet for businesses – and only businesses – of every size, from small-scale shops to enterprise-level corporations. Guaranteed bandwidth and dedicated connectivity keep up with the way businesses work and help employees spend more time working instead of waiting. Best of all, the headaches and hassles of shared broadband are entirely absent – the connection is yours and yours alone.

Features and Benefits

- **Reliable and resilient fiber-based connectivity** keeps your business running even under adverse circumstances.
- **Seamlessly connect and collaborate** in real time with symmetrical upload and download speeds.
- **Highly scalable bandwidth** and speeds up to 10 Gbps adapt and change to meet your capacity needs of today and tomorrow.
- **Never-shared access** eliminates congestion from outside users while maintaining a reliable and secure connection across your network.
- **With carrier-class Service Level Agreements (SLAs)** the capacity you need is the capacity you pay for.
- **Always-on DDoS Protection from unwanted traffic** is automatically detected and deflected.

Specifications

Speeds from 20 Mbps up to 10 Gbps
