

Managed Router

A personalized approach to managing your devices and service

There's more involved with your business than ensuring your employees and devices can connect to your network and communicate. Instead of wrestling with router settings and troubleshooting network problems, shouldn't it be easy for your teams to spend time and resources on work that makes a difference?

Why Segra Managed Router

Segra Managed Router allows businesses of every size to outsource the end-to-end management of their router systems, from installation and configuration to ongoing monitoring and routine maintenance. As your business evolves and grows, the service scales alongside, ensuring vital traffic and communications can move with speed and security. The best part? Because the workload is handled by Segra experts, IT teams can devote high-demand resources and attention to other mission-critical projects that support operations and add value.

Specifications

Speeds from 1 Mbps up to 500 Mbps

Available across the entire Segra fiber-based footprint

Segra WAN service (DIA or VPRN) required

Features and Benefits

- **OSPF and BGP router-level disaster recovery** protocols automatically restore service to your systems in the event of an outage.
- **Multiple Quality of Service options** provide greater application performance and network capacity.
- **Scalable throughput** can be rapidly adjusted to deploy bandwidth at a new location or adjusted according to staff needs.
- **Ongoing WAN router monitoring** helps reduce operating costs and maximizes IT resource availability.
- **DNS and DHCP configuration** offer enhanced network security and improve protection against DNS-based cyber attacks.
- **Router performance** is backed by 24/7/365 monitoring & maintenance for added peace of mind.
