Managed **Wi-Fi**

All the right access in all the right places.

A strong wireless signal should be available where you need it, whenever you need it. Making that possible is easier said than done.

Why Segra Managed Wi-Fi

Few things matter more than maintaining a strong, stable, secure Wi-Fi connection. That's why getting it right is so important.

Segra Managed Wi-Fi takes the heavy lifting involved with meeting the needs and expectations of staff and visitors alike off your shoulders. Everything that's needed to deliver the right access to the right places, from design and implementation to ongoing monitoring and maintenance, is handled by experts, ensuring optimal functionality no matter what.

Specifications

Available across the entire Segra footprint

Segra WAN (DIA or VPRN) required

Features and Benefits

◦ **Easily scalable:** On-the-fly adaptability makes it easy to adjust bandwidth to meet changing throughput needs.

◦ **Closely watched 24/7/365:** Segra Network Operations Center handles the heavy lifting, ensuring peak WLAN operation and functionality.

◦ **Fewer costs and challenges:** Deployment and management is handled by our experts, freeing up valuable IT resources and reducing operating costs.

◦ **One-stop simplicity:** Wi-Fi and WLAN services run from a single central hub for greater operational efficiency.

◦ **Tailored to your needs:** There's nothing "one-size-fits-all" about it. Pre-deployment analysis and wi-fi capacity planning ensure a made-to-measure fit that works with your needs.
