

Security Operations Center as a Service (SOCaaS)

Cyberattacks are no laughing matter. Your cybersecurity approach shouldn't be, either.

Comprehensive cybersecurity that can defend against the threat of attack isn't just "another cost of doing business" – it's a critical part that makes it possible for you to stay in business.

Why Segra SOCaaS

Threats to your operations are closer than they may appear. Take your eyes away for just a second and your business could go from success to statistic in the blink of an eye.

An effective cybersecurity and threat readiness posture goes deeper than just antiviruses, firewalls and traditional perimeter defenses. That's where Segra SOCaaS comes into play. Designed to go where conventional methods can't, your entire IT ecosystem is covered with active protection measures and watched over by InfoSec experts day in, day out, day after day.

Features and Benefits

- **Smart, adaptive threat detection** and response capabilities are powered by machine learning and AI-generated behavioral models and user activity analytics.
- **SIEM alerts and alarms** are handled by a U.S.-based team of skilled SOC experts, including Tier 1 Analysts and Advanced Security Engineers.
- **Fully compliant** with major regulatory standards, including HIPAA, PCI, FFIEC and ISO.
- **End-to-end management and monitoring** with no local on-prem installation required translates into reduced IT workloads and predictable, OpEx- and CapEx-friendly costs.

Specifications

24/7/365 support

Turnkey deployment

Three-minute SLA threat response guarantee

Security Information and Event Management (SIEM)

Network Firewall
