

# Mobile Voice

Move your businesses communications to the next level with Mobile Voice. Segra's highly secure SIP-based softphone solution is specifically designed for the iPad, iPod touch, iPhone, Android enabled tablets and phones.

Stay connected and manage your calls and availability with HD voice and video features. An intuitive user interface facilitates communication with multitasking functionality that allows Mobile Voice to run in the background while accessing other applications during a call.

Enjoy face-to-face communications with feature-rich Video Calls. Mobile Voice becomes an extension of your PBX, allowing you to take your desk phone with you - ANYTIME, ANYWHERE.

## ENHANCES PRODUCTIVITY

With Mobile Voice, you can manage your voice and video communications on the go, as if you were using your desk phone.

## ENABLES COLLABORATION

You can call and collaborate with co-workers, just like you would in the office.

## IMPROVES CUSTOMER EXPERIENCE

Even if you are away from your desk phone, you can still be available for a voice or video call with a customer.

## SAVES COSTS

There are no overage charges with the Mobile Voice service when it is connected to Wi-Fi.
